The gold market was quiet and steady for a while during the morning at 1114 to 1112, but when it became understood that the suspended house was heavily short of the market, and that their contracts would have to be covered, the market became active and strong, and under free bidding advanced to 1121. The sudden advance brought out large offerings, which broke down the price again to 1111, from which it reacted to 1121, and closed at 1124 to 1122. Outside of this there were no considerations affecting the premium. The Bank of England minimum discount rate was unchanged at the regular weekly meeting of the directors this morning, it remaining 3 per cent. The million in the Bank decreased £100,000 during the week; and £10,000 was withdrawn to-day. The Bank of France gained 2,000,000 francs during the week. The London market for securities is quiet and steady. We have yet to hear the echo from London of to-day's events. The bids for the Treasury gold averaged \$237,300 each at 110 to 1115; and in view of the exciting events on the street, the Secretary of the Treasury concluded not to sell any gold, and this for a time stayed the excitement on the street. It is reported that the Treasury proposes to let out several millions of its currency balance now on hand, but the report is believed to be utterly without foundation by those likely to be well informed on the subject, including the Assistant Treasurer, Gen. Hillhouse. On gold loans the rates paid for carrying were 5, 4, 3, 2, and 6 per cent until near the close, when 1-16 was paid over night.

The Assistant Treasurer paid out \$50,000 in coin interest on the public debt, redeeming \$75,000 given at Five-Twenties. The day's business at the Gold Exchange Bank covered: Gold cleared, \$31,678,000; gold balances, \$1,941,070; currency balances, \$1,371,304. The quotations were as follows:

10:00..... 1114 1/2 to 1120 1/2..... 1125 1/2
10:15..... 1114 1/2 to 1120 1/2..... 1125 1/2

The money market was unsettled all day. Early borrowers were accommodated at 7 to 7 per cent gold. Later as the shrinkage in stock values caused a good deal of shifting of loans, borrowers were forced to pay as much as 1 per cent bonus very freely, with exceptions as high as 2, a state of things not likely to last long.

United States bonds were unsettled, the market closing feverish on the basis of 1124 to 116 for 1857. Fisk & Hatch report as follows:
